

Model # DS1000

**PNEUMATIC
DOOR SKINNING
TOOL**

**FORGED AND HARDENED
STEEL CRIMPING HEAD**

is specially designed to roll the steel flanges over with a minimum of physical effort, and leaves the flange smooth without unsightly ripples.

**CLOSE TOLERANCE DESIGN
AND MANUFACTURING,**

results in a tool that is incredibly smooth, quiet, and easy to use.

**SAVE TIME...
LOTS OF TIME**

**ALLOWS TOOL TO MANEUVER AROUND
INNER AND OUTER CURVES AS WELL AS
MOST BODY DESIGN FEATURES**

BENEFITS TO TECHNICIANS:

- Drastic reduction in the time required to install a door skin. As much as an hour or more can be expected improving your bottom line in a commission or rate environment.
- One handed operation to allow for free hand to manipulate the work piece.
- Variable flange thickness adjustment allows for accurate dispersement of panel adhesive in the crimped area resulting in a smooth glue bead.
- Drastic improvement in the quality of the finished product.
The finished crimp typically is indistinguishable from a factory crimp.
- Patent #6,578,404
